QUALITY IN WOOD SINCE 1857

The background of the advertisement is a photograph of a classic interior. In the center is a light grey upholstered armchair with a dark wood frame featuring ornate carvings. To the left is a white fireplace mantel with a black clock and a small statue. To the right is a white door. The floor is made of light-colored wood planks. The text 'SUPREME LIVING' is overlaid in large white letters.

SUPREME LIVING

Today's interior market is characterized by an abundance of furniture, textiles and other interior materials, in all sorts of styles and looks. This means that a traditional and uniform selection of floors is not enough, either for consumers interested in interior design or professional designers. This is why we at Kährs have developed Kährs Supreme, a range of floors including three striking and unique floor collections, all with a great variation of looks and styles.

The common denominator of these three collections is the manual work and the attention to detail that we have put into each floor. We have combined Kährs unique and long tradition of producing high quality floors, with the rich experience of highly skilled craftsmen, who by using their own hands have given each floor a distinct look that cannot be re-created by machines. Supreme Living is a tribute to their skills!

Stina Andersson, Designer, Kährs.

GRANDE COLLECTION

The Grande Collection is ideal for those searching for a traditional looking 'plank' floor in dimensions previously not available in a modern multi-layered format. The range includes a variety of styles and color variations, for the most ambitious interior designs.

Striking in terms of both natural beauty and scale, the floors measure over nine feet long by ten inches wide, and have a thickness of three-fourths of an inch.

You can choose to either let them set the tone for your whole design scheme or form part of a wider interior theme.

The designs of these floors will complement any style of decoration, from traditional country to slick contemporary. The character of the timber, with its knots and cracks, will lift any interior design.
