

Kährs®
QUALITY IN WOOD SINCE 1857

The **Artisan** Collection

THE KÄHRS ARTISAN COLLECTION is the ultimate artistic wood flooring range. It is based on the unique character of Oak, in combination with highly skilled craftsmanship.

Each design within the Artisan Collection has its own unique style and character.

The range spans from pale white to almost black, giving you a wide spectrum of color variations. A variety of different hand-made surface designs provides even greater scope, with options available to suit all interior styles; each providing a striking and incredibly durable floor.

While the floors have a traditional solid plank design, they are built according to the principles of a modern, fully stable multi-layered wood floor. So, they offer the same superb performance you'd expect from Kährs – inventor of the modern engineered floor!

WOODLOC®, THE STRONGEST JOINT

In 2000, Kährs, the oldest wood flooring manufacturer in the world, introduced Woodloc® – the strongest mechanical joint available. Woodloc® not only makes installation easier, it also creates an incredibly strong, tight joint and a perfect finish without the use of glue. And, as it locks the boards together, it eliminates gapping too!

THE BEST CLIMATE STABILITY

Since wood is constantly striving for moisture balance – swelling and shrinking in three directions – a solid piece of wood is, by its very nature, unstable. Kährs multi-layer construction reduces this movement by up to 75%, offering enhanced stability throughout the seasons.

NATURE OIL

Kährs Nature oil gives your floor a wonderfully natural and beautiful feel. The oil brings out the wood's texture and graining, and enhances its tone. While easy to maintain, remember that floors treated with Nature oil need a little more care and should be treated with Kährs UV/Nature Oil Refresher regularly.

GREEN SINCE 1984

In 1984, Kährs became the first manufacturer to introduce an entirely solvent-free production process – years before this became general practice in the industry. Kährs raw material is also sourced with strict environmental controls. Suppliers are chosen principally from those who hold an FSC (Forest Stewardship Council) or PEFC (Program for the Endorsement of Forest Certification) certificate or equivalent, or who can in some other way document that they operate environmentally aware timber procurement

FOR PEACE OF MIND – GUARANTEED!

Kährs invented and patented the modern engineered wood floor in 1941 and, today, its floors are still based on the same construction method. One which provides the highest quality and performance, combined with beauty and easy care. And, for peace of mind, Kährs Artisan range is offered with a 25-year guarantee.

KÄHRS ARTISAN COLLECTION

1-strip 74 3/4" x 7 1/4"

Board thickness: 5/8"
Surface layer thickness: 1/8"
Core material: Spruce/Pine/
Poplar

Resandable: 2 times
Guarantee: 25 years
