

SOMERSET FLOORING  
IS MADE IN AMERICA  
TO MAKE YOUR  
HOME BEAUTIFUL

MADE  
IN THE  
USA

**MADE  
IN THE  
USA**

## PART OF THE BEAUTY OF YOUR NEW FLOOR IS THAT IT'S PROUDLY MADE IN THE USA

We believe customers choose hardwood flooring for a variety of reasons. Some simply love the incomparable beauty and design versatility of real wood. Many appreciate that it adds value to their property. While others choose wood because it's sustainable and eco-conscious.

We trust you will choose Somerset because we have the stylish looks you want, and the quality and value you expect. We also hope one of the reasons you decide to buy Somerset is that it's made in the USA, from Appalachian hardwoods, by dedicated American workers who take pride in what they do. Thanks to the support of our customers, we have enjoyed great success and growth over the years. We continue to expand our capabilities and capacity to bring you a wide variety of flooring styles to make your home beautiful. We sincerely appreciate your consideration and business and hope you enjoy your new Somerset floor.

**38** COLLECTION OVERVIEW

**NEED TO KNOW:** Actual product samples provide the most accurate representation of color and should be used for purchase decision making. Printed photographs and color swatches are provided for reference and comparison, but due to the natural variations in wood and the limitations of commercial printing, your new floor will vary in appearance from any samples or pictures shown.

## AMERICAN COUNTRY COLLECTION

—by Somerset™—

ENJOY THE TEXTURE AND TIMEWORN APPEARANCE OF SOLID AND ENGINEERED FLOORING THAT FEATURES SUBTLE HAND SCRAPING AND RUSTIC CHARACTER MARKINGS.

Aptly named “American Country,” we developed this collection to answer the many requests we’ve received for character-rich, subtly scraped hardwood flooring that’s made in America. Hand scraping is a technique that customizes selected pieces of flooring, and is more labor intensive to produce than smooth hardwood flooring styles. With the rustic scraped look gaining popularity in the last several years, imports entered the U.S. market at very competitive prices. While we heard from many American homeowners that they loved the look, they didn’t love that the products weren’t made in the USA. We listened, and have made a major investment in the tools, efficient manufacturing techniques, and skilled craftspeople to offer the look and value demanded by our customers, all made by Somerset in the USA.

Somerset is proud  
to be a member  
of Appalachian  
Hardwood Manufacturers, Inc.  
AHMI has verified data from  
the U.S. Forest Service that  
timber harvesting from the  
Appalachian Hardwood  
Territory as defined by AHMI  
is able to meet present needs  
without compromising those of  
future generations sustainably.

## HOMESTYLE COLLECTION

by Somerset™

MADE  
IN THE  
USA

SOLID APPALACHIAN OAK FLOORING  
WITH THE ADDED DESIGN FEATURE  
OF A FOUR-SIDED EASED EDGE.

Somerset is a true full line manufacturer, offering solid and engineered flooring in a variety of species, colors, and styles. Recently customers have been asking us to provide a collection of solid flooring with not only eased edges, but eased ends, as well (our standard solid flooring styles have an eased edge/square end profile). We listened, and now you have the option of solid flooring with a four-sided eased edge profile in a full range of colors. At Somerset we pride ourselves on listening to what our customers want and finding ways to exceed their expectations.

## CHARACTER COLLECTION

—by Somerset™—

GIVE YOUR SPACE SPECIAL CHARACTER  
WITH HARDWOOD FLOORING  
THAT FEATURES NATURAL KNOTS,  
VARIATIONS, AND MARKINGS.

In recent years, the popularity of rustic flooring has grown. We think it's because of the increasing desire to bring natural beauty into our spaces. It took several years for us to develop our Character Collection to ensure the authentic representation of naturally occurring knots, mineral streaks, and markings that would meet our customers' expectations. Today this is one of our most popular collections.

SOUTHERN ANTIQUES  
COLLECTION  
—by Somerset™—

MADE  
IN THE  
USA

ONE OF OUR MOST AFFORDABLE  
COLLECTIONS, SOUTHERN ANTIQUES  
IS AN ASSORTMENT OF 3/8" ENGINEERED  
FLOORING IN SMOOTH AND SCRAPED  
STYLES TO GIVE YOU EXCITING CHOICES.

The Southern Antiques collection was developed  
as an answer to customer requests for USA-made,  
value-priced, wider plank oak, maple, and hickory flooring  
in engineered construction. With our investment in U.S.  
manufacturing facilities and capabilities, we are able to  
offer this exciting collection that features smooth and  
subtly scraped rustic styles—so you can enjoy the  
look you want virtually anywhere in your home.

COLOR YOUR SPACE WITH  
APPALACHIAN OAK FLOORING.  
CHOOSE FROM A RANGE OF COLORS,  
IN STRIP AND PLANK WIDTHS.

Oak remains one of the most popular species for hardwood flooring. This classic collection was developed to offer Somerset's Appalachian oak flooring in a complete range of widths and colors. Over the years, we have refined our color selection, based on customer preferences, to meet a wide range of decorating needs.

And now, we offer both solid and engineered construction with the same beautiful look.

 of being customer friendly.

## SPECIALTY COLLECTION

—by Somerset™—

MAKE A STATEMENT WITH  
APPALACHIAN HICKORY AND MAPLE  
FLOORING—BEAUTIFUL ALTERNATIVES  
TO TRADITIONAL OAK FLOORING.

When we entered the prefinished marketplace years ago, we recognized an opportunity to offer species other than oak in wider plank widths—and it was one of the things that set the Somerset brand apart from the rest. This Collection has remained popular over the years with those customers looking for something a little different. We now offer hickory and maple in both solid and engineered construction.

Somerset is one of  
only a few flooring  
manufacturers to employ  
a full-time forestry staff  
to oversee best forest  
management practices.

## HIGH GLOSS COLLECTION

—by Somerset™—

APPALACHIAN OAK FLOORING  
IN A RANGE OF POPULAR COLORS,  
FOR THOSE WHO PREFER  
A GLOSSIER FINISH.

When more and more homeowners started requesting our flooring with a higher gloss finish, we answered with this collection of oak flooring in a range of colors and widths. The finish is the same Ultimate™ Finish we use to protect all of our flooring—just “kicked up” a few notches in gloss level.

APPALACHIAN SPECIES: Red Oak, White Oak

At Somerset, we have a pretty simple approach to doing business... we just try to do the right things for our customers, our employees, and our environment. It also means we are committed to growing manufacturing in the USA.

#### OUR MADE IN AMERICA INITIATIVE

Somerset's Made in America Initiative means we are committed to making the best quality products at the best prices here in the USA—it's really that simple. We are continually evaluating and investing in quality improvement processes and the necessary facilities, equipment, and people to allow us to deliver the greatest value to our customers. Beginning in 2012, all Somerset flooring is made in the USA. And we are very proud of that.

Somerset is a privately owned, vertically integrated forest products company—and one of the largest manufacturers of Appalachian lumber and hardwood flooring in the U.S. We own and manage timberlands and are one of the largest lumber buyers in our region. With multiple manufacturing plants in Kentucky and Tennessee, we continue to expand capabilities and capacity to meet demand. By being vertically integrated, we are able to manage the entire manufacturing process, ensuring consistent quality control that produces the finest products, while making the best use of our natural resources.

#### AT SOMERSET, ENVIRONMENTAL RESPONSIBILITY IS ABOUT INVESTING IN ACTIONS...NOT WORDS

Somerset has been a green company before being "green" became popular. We don't spend our time and money on ads bragging about our eco-responsible practices. Instead we believe our resources are more wisely spent investing in ways to become more environmentally conscious.

#### Here are some of the reasons you can feel good about buying Somerset products:

##### Full-Time Forestry Staff

We employ a full-time forestry staff to sustainably manage the timberlands we own, and to work to insure best forestry management practices with independent foresters and sawmills from which we purchase lumber. Our foresters create 100-year plans for the forest we own. Our lumber comes from approximately a 150-mile radius of our manufacturing facilities.

##### "Waste Not" Philosophy

Somerset has a "Waste Not" philosophy, which means we use every part of the tree. Excess wood fiber and sawdust generated through our manufacturing operations goes to fuel our plants or to the manufacture of Somerset Wood Pellet bio fuel. This reduces our country's dependency on fossil fuels and helps our environment.

##### "Engineered" Flooring Goes a Long Way

Somerset now manufactures 1/2" engineered flooring in random lengths with a sawn face that duplicates the look of a solid floor. So lumber that would be used to produce one 3/4" solid piece of flooring produces four or five face veneers for engineered flooring. It's another way we conserve our natural resources while allowing customers to enjoy the beauty and benefits of real wood.

#### We Carefully Select and Partner with Suppliers that Share Our Commitment to Sustainability

[www.ppg.com/woodcoatings](http://www.ppg.com/woodcoatings)

PPG Industries' vision is to continue to be the world's leading coatings and specialty products company. Through leadership in innovation, sustainability and color, PPG helps customers

in industrial, transportation, consumer products, and construction markets and aftermarkets to enhance more surfaces in more ways than does any other company. Founded in 1883, PPG has global headquarters in Pittsburgh and operates in more than 60 countries around the world. Sales in 2011 were \$14.9 billion. PPG shares are traded on the New York Stock Exchange (symbol:PPG). For more information, visit [www.ppg.com](http://www.ppg.com).

#### Feel good about buying Somerset.

We are a privately owned company, dedicated to bringing you the best quality while strictly adhering to best forest management practices. We are an FSC certified company and are supporters of the following industry organizations:

MADE  
IN THE  
USA

*"Our customers have sent a clear message to us that they want to buy American-made products. We have made major investments in our manufacturing operations that allow us to meet demand with a wide variety of products made by Somerset right here in the USA. We are committed to continuing to provide our customers with the products they want and the value they expect from Somerset."*

—Steve Merrick, CEO, Somerset Companies

# THE SOMERSET FLOORING ADVANTAGES

## SOMERSET OFFERS SOLID AND ENGINEERED FLOORING THAT GIVES YOU THE PREFERRED LOOK.

Somerset manufactures our collections from Appalachian hardwood lumber. The natural conditions that create the Appalachian Mountains' magnificent scenery also produce some of the world's most beautiful hardwoods.

Whether you choose Somerset's 3/4" solid flooring, or 1/2" engineered flooring—you get the same beautiful look. The thick solid top layer of our 1/2" engineered flooring is identical in appearance to our solid flooring (actually cut from a solid block of Appalachian lumber, as is our solid flooring). The main difference is that our engineered flooring is supported with cross-grain construction to give you versatility in installation (install virtually anywhere in your home).

With Somerset, you can install either solid or engineered flooring—or both—in your home, and only you and your contractor will know which it is.

## 3/4" SOLID CONSTRUCTION AND 1/2" ENGINEERED CONSTRUCTION

- Appalachian Hardwood Species
- Preferred Look of Sawn Face
- Random Lengths
- Protected by the Ultimate™ Finish
- Somerset Limited Warranty
- Can be Refinished if Ever Desired or Needed (we recommend refinishing be done by a professional flooring contractor)

### **S** 3/4" SOLID CONSTRUCTION

- Install on or above grade only
- Nail or staple-down only over appropriate subfloor

### **e** 1/2" OR 3/8" ENGINEERED CONSTRUCTION

- Install on, above, or below grade
- Glue, nail, staple, or float over appropriate subfloor
- Multi-ply cross grain construction for greater dimensional stability
- 1/2" has 3mm thick wear layer
- 3/8" has 2mm thick wear layer

## You get the Incomparable Beauty of Appalachian Hardwood Species

All Somerset flooring (both 3/4" solid and the face layer of our engineered flooring) is manufactured from Appalachian species of red oak, white oak, maple, hickory, walnut, or American cherry. Some of the finest lumber in the world comes from the Appalachian Mountain region of the United States, where Somerset is located. The lumber is considered superior because of the benefits inherent in the location and the land. The climate is a main factor in producing the naturally superior quality—the area's warm summers and cool spring and fall seasons insure that the growth of the trees is gradual. Slower growing trees results in tight growth rings, consistent grains, and strong fibers that lead to strength, durability, and beauty.

## We Don't Mix Red and White Oak

Red and white oak are both beautiful, durable hardwoods, especially Appalachian oak. Both have unique color variations and characteristics, and they take stain differently. One of the main advantages of not having species mixed within your floor is for better color consistency now, and should you ever need or choose to have your floor sanded and refinished in the future. To give you the best looking, best performing oak flooring, we do not mix the two species.

## We Apply One of the Thickest Aluminum Oxide Urethane Finishes on the Market

Somerset's Ultimate™ Finish is an advanced UV-cured formulation of aluminum oxide and urethane. Our proprietary multi-step finishing process protects your floor with a thick, durable shield that is resistant to wear and provides exceptional gloss retention. In addition, we implement a full fill face operation in our finishing process. This important step seals the pores of the wood, resulting in a smoother, more consistent surface onto which we apply the remaining finish coats. The final flooring has a durable easy-care finish that enhances the natural beauty of the wood and is built for lasting

performance in your home. Depending on the Collection you choose, Somerset flooring is available in low gloss, satin, and high gloss finishes to give you the look you want. We guarantee the finish will not wear through for 50 years (25 years for Value and Southern Antiques Collections).

## Somerset's Limited Warranty is one of the Strongest in the Industry with a 50-Year Finish Wear Layer Warranty

We feel that no other hardwood flooring in the industry is manufactured to higher quality standards than a Somerset hardwood floor. All the flooring presented in this brochure is backed by our Lifetime Structural Warranty; in addition, our 50-Year Finish Wear Layer Warranty provides assurance that the surface finish layer will not wear through or separate from the wood for 50 years from the original date of purchase (Value Collection and Southern Antiques Collection carry a 25-year Finish Wear Layer Warranty). Some exclusions and conditions apply, so please ask your dealer for a copy of our limited warranty, or visit [www.somersetfloors.com](http://www.somersetfloors.com) for complete warranty details.

NATURAL BEAUTY MEANS NATURAL VARIATIONS

The patterns and color variations created in a living tree are like all of nature—never repeated. Naturally occurring wood characteristics such as mineral streaks, knots, and variations in grain and color, are not considered defects. Also, all hardwood flooring will undergo color changes over time and with exposure to light. As a result of these natural characteristics, as well as the limitations of printing, your newly installed Somerset floor will vary from samples or pictures shown.

ENJOY EASY CARE WITH PRODUCTS SPECIALLY FORMULATED FOR YOUR FLOOR

Somerset floors are easy to care for. Simply vacuum or dust mop on a regular basis, wipe up spills as they happen, and routinely clean your floor with Somerset’s Ultimate Wood Floor Cleaner™. Touch-Up Kits are available to repair minor surface damage. If your dealer does not carry Somerset care products, visit our website for information on where to purchase and for additional care and maintenance tips.

MOLDING AND TRIM ITEMS COMPLETE THE INSTALLATION

Somerset offers solid hardwood molding and trim items to complement your new floor. Everything you need including reducer, quarter round, stair nosing, baby threshold, and t-molding are available to complete your installation. Ask your retailer for more information on what you need so you can order them when you buy your flooring.

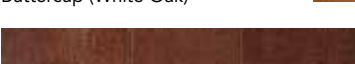

Get molding profile and size information at [www.somersetfloors.com](http://www.somersetfloors.com)
