

# Why Choose Ten Oaks Six Side Seal flooring?

Once, there was a parade of homes.  
Two homes were built by the same builder,  
in the same subdivision, on the same street,  
laid by the same flooring contractor .

Can you tell the difference? (see next page)

## Benefits of a Ten Oaks Sealed Unfinished Floor

- \* Keeps flooring "manufacture fresh", enabling a more accurate match and less overwood.
- \* Increases dimensional stability for the life of the floor.
- \* Incorporates anti-mold, anti-mildew, and anti-bacterial additives under and around each piece of flooring.
- \* Requires no acclimation (when job site meets NWFA specifications.)
- \* Protects floor from dirt and spills on jobsite before sanding
- \* Highlights color and character for better grading at the mill and better installation at the jobsite.
- \* Provides physical barrier to insect infestations.

# How about now?

*Competitor's flooring*

## Benefits of a Ten Oaks Sealed Prefinished Floor

- \* Keeps flooring "manufacture fresh", enabling an accurate, *actual* square-edge prefinish (no micro-bevel).
- \* Increases dimensional stability for the life of the floor.
- \* Incorporates anti-mold, anti-mildew, and anti-bacterial additives under and around each piece of flooring.
- \* Requires no acclimation (as long as job site meets NWFA specifications.)
- \* Provides physical barrier to insect infestations.
- \* Comes in natural Red Oak, natural White Oak, or stained colors.
- \* Requires no sanding.
